Organizations

Fridays for Future

https://fridaysforfuture.org/

Friday's for Future…or FFF, is a global climate strike movement that started in August 2018, when 15-year-old Greta Thunberg began a school strike for climate. In three weeks leading up to the Swedish election, she sat outside Swedish Parliament every school day, demanding urgent action on the climate crisis. She was tired of society's unwillingness to see the climate crisis for what it is: a crisis.

To begin with, she was alone, but soon she was joined by others. On the 8th of September, Great and her fellow school strikers decided to continue their strike until the Swedish policies provided a safe pathway well under 2° C, i.e. in line with the Paris Agreement. They created hashtag #FridaysForFuture, and encouraged other young people all over the world to join them. This marked the beginning of the Global Strike for Climate.

Their call for action sparked an international awakening, with students and activists uniting around the globe to protest outside their local parliaments and city halls. Along with other groups across the world, Fridays for Future is part of a hopeful new wave of change, inspiring millions of people to take action on the climate crisis, and we want you to become one of us!

STEP Philippines

https://www.facebook.com/stepphils/?ref=page_internal

STEP is a youth-led nonprofit organization, we envision environmentally-mindful and engaged citizens in protecting the sea & terrestrial environment of the Philippines. We aim to raise proactive young leaders, citizen scientists, & conservation educators.

YOUNGO

http://www.youngo.uno/

YOUNGO is the Youth Constituency of the UNFCCC. It consists of many youth-led organizations, groups, delegations, and individuals working in climate change-related fields.

YOUNGO runs various Working Groups focusing each on specific aspects of the climate change within the UNFCCC negotiations and events to ensure that perspectives of young and future generations are taken into account in the multilateral decision-making processes. Besides that, YOUNGO members observe and report on climate negotiations, and the implications of their outcomes.

Youth Climate Leaders

https://www.youthclimateleaders.org/

Created in 2018 by four Brazilian women, Youth Climate Leaders (YCL) offers solutions to help young people tackle two main challenges of this century: the climate crisis and structural unemployment. Although young people make up the majority of the global population, they continue to encounter barriers to job opportunities and economic security, while dealing with an uncertain future due to the climate crisis.

To reverse this scenario, we aim to empower 1 million young people to lead climate projects as part of a global network. We believe that it is possible to propagate professional opportunities for young people through education

and bridging gaps with organizations that already operate in this sector. We also offer access to a global network and opportunities in organizations and projects engaged in the transition to a more just and carbon neutral society. Kevin engages widely across all tiers of government (UK and Sweden) on issues ranging from shale gas, aviation and shipping to the role of climate modeling (IAMs), carbon budgets and 'negative emission technologies'. His analysis previously contributed to the framing of the UK's Climate Change Act and the development of national carbon budgets.

Youth and Environment Europe

https://yeenet.eu/

Youth and Environment Europe (YEE) is the largest independent European network of environmental youth organizations. YEE unites 52 member organizations coming from 30 countries.

Our mission is to unite environmental youth non-profit organizations in Europe. YEE goal is to mitigate the climate crisis by:

– raising awareness and building capacity among youth on the climate crisis;
– enhancing international cooperation and knowledge-sharing among our members;
– strengthening the participation of youth in environmental and climate decision-making processes.

YEE was founded as the European region of the International Youth Federation for Environmental Studies and Conservation (IYF) in 1983. YEE is a member of the United Nations Environment (UNEP), European Environmental Bureau, and European Youth Forum, and a co-founding member of the EU4Ocean Coalition. Our HQ is in Prague, Czech Republic.

All activities and projects of YEE are organized and carried out by young people under 30. YEE organizes, facilitates and supports projects and campaigns aiming to increase the knowledge, understanding, and appreciation of the environment and the awareness of climate issues among young people in Europe. We are also an active hosting organizations for the European Solidarity Corps volunteers.
